Ten Commandments of Body Mechanics

1. Clue the patient in: be sure the patient knows what you’re going to do - and how you are going to do it - and how he can help.

2. Size up load, get help if load (equipment or patient) to be lifted is more than you can handle - regardless of the wait.

3. Check your footing: your feet should be apart to give you a broad base of support for better balance and stability.

4. Move close instead of reaching from a distance. Move in and hold object close to your center of gravity (concentrated mass in pelvic area).

5. Squat: don’t use “mobility” (back) muscles. Bend hips and knees and keep back straight.

6. Lift: use “work” (thigh) muscles by straightening your legs.

7. Be smooth and synchronized: avoid strain produced by jerky movement. Get together (it’s a good idea to count 1, 2, 3) with the person helping you.

8. Turn: don’t twist—Shift position of your feet to turn—don’t twist your body.

9. Don’t lift when you can pull or push the patient. It’s safer and easier than lifting.

10. Teach and preach: offer a “good word” to others - so all of us will lift well and safely.

WHAT IS ERGONOMICS?

Ergonomics is the science of fitting the job to the worker. When there is a mismatch between the physical requirements of the job and the physical capacity of the worker, work-related musculoskeletal disorders (MSDs) can result.

Ergonomics is the practice of designing equipment and work tasks to conform to the capability of the worker; it provides a means for adjusting the work environment and work practices to prevent injuries before they occur.

Healthcare facilities have been identified as an environment where ergonomic stressors exist. Hospital ergonomic exposures that may lead to MSD injuries are multi-faceted. Each exposure needs to be assessed and a remedial plan developed.

RMR Loss Control is available to assist with an assessment. Call 501.664.4173 or 800.863.5045.

AHA Workers’ Compensation Self-Insured Trust Program is administered by Risk Management Resources (RMR), a division of BancorpSouth Insurance Services, Inc. www.bxsi.com. In March 2003 the AHA Workers’ Compensation Self-Insured Trust was established. The program provides workers’ compensation coverage to AHA members.

Risk Management Resources, the administrator for the program, assists members in the areas of claims management, safety and loss control. Tina Creel, Vice President of AHA Services, Inc., is the Group Manager of the Trust and provides oversight of the day-to-day operation of the Trust.

The Board of Trustees provides oversight of the overall operation of the Group Trust.
